FILMMAKER - DIRECTOR, WRITER, SET&SFX SPECIALIST, PRODUCER

I'm a Finnish filmmaker, producer, and media/communications professional living in Southern Finland.

I graduated from the renowned FAMU film school in Prague, and studied film and media at the Turku Art Academy. Additionally, I'm a Master Artisan and a licensed SFX technician. I have also studied Information Science at Masters level and have several certifications in safety, first aid, transport, and leadership.

My specialty is directing and screenwriting, but I'm also proficient in production and project management. I'm competent in production design and work supervision, special effects design, and digital visual effects. As a director I strive for a strong artistic viewpoint, enjoying subversion and strong themes; as a project leader, I'm dedicated to the crew's welfare and staying within schedule and budget. I understand the realities of marketing, can coordinate extensive projects, and manage internal and external communications. I have superb IT skills ranging from office apps to specialist film and 3D VFX software. I have significant international experience across Scandinavia, Europe and Asia. I can both competently lead a team and work as a dedicated crew member. I plan meticulously, but I can also improvise quickly when needed.

I'm interested in various forms of art, from painting to pottery, dabble in amateur theater, enjoy a wide range of sports including circus arts and martial arts, and have a passion for travel—particularly scuba diving in warm waters and sailing on historical ships to explore unknown ports.
